

Assalam Alaikum my dear members,

Welcome back! Indeed, after a long break, I hope we are all ready to get back on track to receiving new and valuable knowledge. I would like to first compose this message to all of you before continuing on with knowledge updates. The purpose of ShialslamGroup has always been to enhance the pursuit of knowledge. Although I constantly try my best to upload new knowledge that is both valuable and worthwhile, I also would like my readers and viewers to enhance their own interest and pursuit of knowledge. I would like the readers and viewers to do their part in finding, distributing, and sharing both the pursuit of knowledge, and the knowledge itself. From the time Islam was brought onto this Earth till the present, it is knowledge that has allowed Islam to grow from its fundamentals to its various outer reaches. It is because knowledge was grasped and spread that Islam is present in every country in this world now. Starting from this period in time, I will commence all my efforts into spreading knowledge, regarding every subject involving the betterment of the world and the religion, Islam. Subjects pertaining to the history of the time, the mathematics and the sciences presented, and literature will be amplified. I hope that my readers and viewers will, likewise, understand the knowledge and spread it as well, whether that is through communication or inviting others to the source. It is possible for me to simply publish the knowledge on my site and finish my part, but I care for the others in this world and cannot be selfish in such matters. Hence, we shall begin, first with weekly lessons about the pursuit of knowledge and Islam's fundamentals that will be sent via e-mail. Second, the knowledge of duas and supplications will be enhanced. I have recently witnessed that there is in much demand an enhancement in the knowledge of the uses of various duas and supplications to be recited on various times. For example, not only are there several manuscripts to be recited in the holy month of Rajab, but there are perhaps thousands of duas and supplications to be recited in each auspicious month. This is very important for our soul and material and spiritual health. Finally, in order to spread out more knowledge of Islam, including its much significant etymology, segments of Hayaat-Al-Qolub will be published weekly as initially planned a few months back. I hope this long break has given everyone's brains a good rest because I have much in store for all of you and I hope you will all take it for betterment of your life, Islam, and the world.

For the sake of not wasting anyone's important time and wealth, I would like to request all those existing members who are interested in continuing the pursuit of knowledge to please reply back to this email as soon as they can. This way, those who are not interested will no longer receive unwanted emails and scripts.

Was Salaam,

Kumail Ali
